QUENCHING OIL A

DESCRIPTION Quench Oils are formulated with selected low sulphur base stocks having excellent oxidation and thermal stability, high fluidity and low volatility, high flash and fire points.

APPLICATION This is an additive type of quenching oil with good dispersant characteristics and has excellent heat transfer properties. It meets the requirement of BIS 2664 additive type. The oil is recommended for general purpose fast quenching applications. The oil can be used for quenching of components including a wide range of steels from low alloy steels to high alloy tool and die steels.
