## 4. FIRST AID MEASURES

For advice, contact Poisons Information Centre (Phone Aust: 13 11 26) or a doctor.

### Description of necessary measures according to routes of exposure

<b>Inhaled</b>	Remove the source of contamination and move the affected person to fresh air. Remove contaminated clothing and loosen remaining clothing. Allow patient to assume most comfortable position and keep warm. If the victim is not breathing, apply artificial resuscitation and seek urgent medical attention.
<b>Swallowed</b>	If swallowed DO NOT induce vomiting. Keep at rest. Seek immediate medical attention. If vomiting occurs spontaneously, keep head below hips to prevent aspiration.
<b>Eye Contact</b>	Hold eyelid open and flush eyes with large amounts of clean water for at least 15 minutes or until irritation subsides. If irritation persists seek medical attention.
<b>Skin Contact</b>	Remove contaminated clothing. Flush affected area with large amounts of water and wash area with soap if available. Seek medical attention for skin irritations.
<b>First Aid Facilities</b>	First Aid kits, safety showers, eye wash station.
<b>Advice to Doctor</b>	Treat symptomatically.

## 5. FIRE FIGHTING MEASURES

<b>General Measures</b>	Do not enter enclosed or a confined work space without proper protective equipment. Fire fighting personnel should wear respiratory protection (positive pressure if available). Clear fire area of all non-emergency personnel. Stay upwind. Keep out of low areas. Eliminate ignition sources. Move fire exposed containers from fire area if it can be done without risk.

## SAFETY DATA SHEET

MSDS No: Product Name: Manufacturers Code:  Date:	PENETRENE AEROSOL PEN400  November 2016	<b>QUICK SMART PRODUCTS</b> <b>53 ASSEMBLY DRIVE</b> <b>TULLAMARINE VIC 3043</b> ABN: 40 959 725 049 Ph: (03) 9338 6655 (BH) Fax: (03) 9335 2598 Email: <a href="mailto:gsmart@bigpond.net.au">gsmart@bigpond.net.au</a> Web: <a href="http://www.quicksmartproducts.com.au">www.quicksmartproducts.com.au</a>

<b>Suitable Extinguishing Media</b>	CO <sub>2</sub> , dry chemical or foam. Prevent contamination of drains or waterways. Do not use water jet or flooding amounts of water. Burning product will float on the surface and spread fire.
<b>Specific Hazards Arising from the Substance or Mixture</b>	Extremely flammable aerosol. Contents under pressure. Keep away from ignition source and open fire. Exposure of containers to extreme heat and flames can cause them to rupture often with violent force. Vapours are heavier than air and may travel along surfaces to remote ignition sources and flash back. A vapour and air mixture can create an explosion hazard in confined spaces.
<b>Hazards from Combustion Products</b>	Under fire conditions this product may emit toxic and/or irritation fumes and gases including carbon monoxide and carbon dioxide.
<b>Special Protective Precautions and Equipment for Fire Fighters</b>	Fire Fighters should wear Self-Contained Breathing Apparatus (SCBA) operated in positive pressure mode and full protective clothing to prevent exposure to vapours or fumes. Cool fire exposed containers with water.
<b>Hazchem Code</b>	2Y

### 6. ACCIDENTAL RELEASE MEASURES

<b>Protective Measures</b>	Avoid contact with spilled or released material. Wear appropriate protective equipment and clothing to prevent exposure. Isolate hazard area and deny entry to unnecessary or unprotected personnel. Eliminate all possible sources of ignition and ventilate the area. Take precautionary measures against static discharge. Ensure electrical continuity by bonding and earthing all equipment.
<b>Spills</b>	Leaking cans should be placed in an open pail until the pressure has dissipated. Contain spillage, then cover/absorb with non combustible absorbent material (vermiculite, sand or similar material), collect and place in suitable marked containers for disposal.
<b>Environmental Precautionary Measures</b>	Use appropriate containment to avoid environmental contamination. Do not let product enter drains, surface water, sewers or water courses. Advise local authorities if this occurs.
<b>Disposal</b>	Contaminated product should be placed in suitable labelled containers for disposal. Dispose of waste according to Federal, EPA, State and Local Regulations. Assure conformity with all applicable regulations.

### 7. HANDLING AND STORAGE

<b>Precautions for Safe Handling</b>	Before use carefully read the product label. Avoid inhalation of vapours and mists, and skin and eye contact. Wear protective personal protective equipment and clothing to prevent exposure. Keep containers securely sealed when not in use. Prevent the build up of mists or vapours in the work atmosphere. Do not use near fire or open flames. Observe good personal hygiene, including washing hands thoroughly after handling. Do not puncture, crush or incinerate containers, even when empty.
<b>Conditions for Safe Storage</b>	Flammable Aerosol. Store in a cool, dry, well ventilated area away from heat or ignition sources. Store away from incompatibles such as oxidizing agents, acids or alkalis. Ensure aerosol containers are adequately labelled, protected from physical damage and sealed when not in use. Check regularly for damaged or leaking containers. Large storage areas should have appropriate fire protection and ventilation systems. For further information reference should be made to Australian Standard AS1940 - The Storage and Handling of Flammable and Combustible Liquids.

### 8. EXPOSURE CONTROL / PERSONAL PROTECTION

**Exposure Standards** No exposure standards have been established for this product by the National Occupational Health and Safety Commission (NOHSC). Exposure Standard for:

	TWA		STEL	
Tetrachloroethylene	50ppm	340mg/m <sup>3</sup>	150ppm	1020mg/m <sup>3</sup>
Oil Mist, Refined Mineral -	-	5mg/m <sup>3</sup>	-	-
Butane	800	1900mg/m <sup>3</sup>	-	-

All occupational exposures to atmospheric contaminants should be kept to as low a level as is workable and in all cases to below the National Standard. These Exposure Standards are guides to be used in the control of occupational health hazards. These Exposure Standards should not be used as fine dividing lines between safe and dangerous concentrations of chemicals. They are not a measure of relative toxicity.

**Engineering Controls** Avoid inhalation. Use in well ventilated areas. Where an inhalation risk exists, mechanical explosion proof extraction ventilation is recommended. Flammable vapours may accumulate in poorly ventilated or confined areas. Vapours are heavier than air and may travel some distance to an ignition source and flash back. Maintain vapour levels below the recommended exposure standard.

**Respiratory Protection** If engineering controls are not effective in controlling airborne exposure then respiratory protective equipment should be used suitable for protecting against airborne contaminants. Reference should be made to Australian Standards AS/NZS 1715, Selection, Use and maintenance of Respiratory Protective Devices; and AS/NZS 1716, Respiratory Protective Devices.

**Eye Protection** Safety glasses with side shields, goggles or full-face shield to safeguard against potential eye contact, irritation or injury is recommended. Eye protection should conform with Australian/New Zealand Standards AS/NZS 1337 – Eye Protectors for Industrial Applications.

**Hand Protection** Gloves made from impervious material to safeguard against possible skin irritation is recommended. Reference should be made to AS/NZS 2161.1 – Occupational Protective Gloves – Selection, Use and Maintenance.

**Body Protection** Suitable protective work wear is recommended.
