Weld Spatter Protector

High performance weld spatter protector and release agent

Description

Weld Spatter Protector is an aqueous liquid blend of high quality base surfactants, antirust additives and other special chemical ingredients.

Application

Weld Spatter Protector is designed to give protection to metal surfaces against the adhesion of welding spatter residues that can occur during the welding process.

Features and Benefits

- **Weld Spatter Protector** is a non hazardous, odourless, water based product ensuring good operator acceptance.
- **Weld Spatter Protector** is easy to use as it can be applied by low pressure spray or by swabbing.
- Being water based, **Weld Spatter Protector** films can be easily removed with simple water rinsing.
- **Weld Spatter Protector** is classified under NOHSC as non dangerous goods and non hazardous, meaning that no special handling or storage requirements are needed.

Directions for Use
